

Canary System Pricing

The Canary System includes the software you need to collect, store, and analyze your organization's process data.

Each system contains data collectors for OPC UA and DA servers, MQTT Sparkplug B brokers, SQL databases, CSV files, various SCADA systems, and both .NET and Web APIs. All collectors are free and can be used as often as needed.

For long-term data storage, the Canary Historian includes a license for 100 tags. You can choose between an unlimited tag licenses or decide to purchase additional tag licenses individually.

Client tools to read and analyze your data are included with each system. These include Axiom, Canary's tool for building trends, dashboards, and reports as well as the Canary Excel Add-in, connecting Microsoft Excel to the Canary System. Additional Axiom and Excel Add-in licenses may be added for extra users.

Extract data from the Canary Historian using the .Net API, Web API, or OPC HDA server that is included with each Canary System. Additionally, Canary has partnered with other software providers to ensure you can easily move data between platforms. These include Spotfire, Flow, Seeq, PowerBI, ESRI, Maximo, TopView, and more. If you need to expose the Canary Historian in an 'SQL-like manner' to client tools that utilize ODBC license the Canary ODBC Connector.

Once you have customized the Canary System to your specific needs, decide where to host your data. You can install the system on your own servers, or use the Canary Cloud. If hosting your own data choose between a perpetual or subscription model.

Perpetual Licensing

Purchase your entire system upfront. Grow the system over time by adding additional tags and client tools.

CANARY SYSTEM

\$4,000

All the software you need to collect, store, and analyze your process data. Includes Canary Collectors, Store & Forward, Canary Historian licensed for 100 tags, Virtual Views, Calculation Server, Events, a concurrent license for Axiom and the Excel Add-in, as well as Canary's Data Connectors.

Additional Licensing Options

EXTRA TAGS

\$1.50

Add tags to the Canary Historian as needed in any quantity.

UNLIMITED TAGS

\$60,000

Remove licensing restrictions from the Canary Historian and scale your database to more than two million tags.

AXIOM USER

\$995

Additional concurrent license for Axiom.

EXCEL ADD-IN USER

\$395

Additional concurrent license for the Excel Add-in.

ODBC CONNECTOR

\$1,995

Exposes the Canary Historian in an 'SQL-like manner' to client tools that utilize ODBC.

CUSTOMER CARE

15%

Provides support from the Canary team, new version releases, and security patches. Annual renewal is 15% of all licensed products. Free for the first year.

Subscription Licensing

Avoid upfront capital expenses by making monthly, quarterly, or annualy subscription payments.

CANARY SYSTEM

\$135 /month

All the software you need to collect, store, and analyze your process data. Includes Canary Collectors, Store & Forward, Canary Historian licensed for 100 tags, Virtual Views, Calculation Server, Events, a concurrent license for Axiom and the Excel Add-in, as well as Canary's Data Connectors.

Additional Licensing Options

EXTRA TAGS

5¢ /month

Add tags to the Canary Historian as needed in any quantity.

UNLIMITED TAGS

\$2,000 /month

Remove licensing restrictions from the Canary Historian and scale your database to more than two million tags.

AXIOM USER

\$35 /month

Additional concurrent license for Axiom.

EXCEL ADD-IN USER

\$15 /month

Additional concurrent license for the Excel Add-in.

ODBC CONNECTOR

\$65 /month

Expose the Canary Historian in an 'SQL-like manner' to client tools that utilize ODBC.

CUSTOMER CARE

Included

Provides support from the Canary team, new version releases, and security patches.

Canary Cloud Licensing

Host your data in Canary's United States based AWS multi-tenant environment.

CANARY SYSTEM

\$450 /month

All the software you need to collect, store, and analyze your process data. Includes Canary Collectors, Store & Forward, Canary Historian licensed for 100 tags, and concurrent licenses for Axiom and the Excel Add-in.

SYSTEM SETUP

\$1,495

Initial setup and configuration for the Canary Cloud.

Additional Licensing Options

EXTRA TAGS

7.5¢ /month

Add tags to the Canary Historian as needed in any quantity.

1 SECOND UPDATES

\$100 /month

Increase your dat collection from 30 second polling to as fast as one second.

8 YEARS OF HISTORY

\$50 /month

Increase your storage capability from 3 years to 8 years.

AXIOM USER

\$35 /month

Additional concurrent license for Axiom.

EXCEL ADD-IN USER

\$15 /month

Additional concurrent license for the Excel Add-in.

OTHER NEEDS

Custom Quote

Customize the offering to your exact needs, to include high availability, stand alone servers, Virtual Views, Calculation Server, APIs, etc.
